

Status report for pigs

The pigs have been a delight to keep. They first arrived in May, to a green patch of field, that they have consequently turned into mud through many hours of rooting and playing. In the summer they enjoyed playing under the hosepipe and making little wallowing holes.

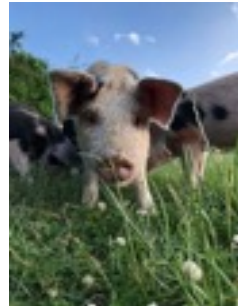

In the pictures you may notice that there are in fact four pigs, this is because my dad decided to get one as we were getting them. We then split feed bills 3:1.

The money you generously gave me has funded the cost of the pigs and a months' worth of food.

I expect that they will go at the end of October, and I will then be able to provide a full report.

Thank you for your support with my ambition of keeping pigs.
